## Big Questions

*Prof. Dr. Ard Louis vs  
Prof. Dr. Ben Moore*

27.10.2016, 6:15 PM  
ETH Zurich main building  
Room E5

## Tuesday 25.10.2016

---

### 12:15 PM **How do you know that?**

Lunch panel discussion on our ways to gain knowledge about ourselves and the world around us.

*Ellis Potter, PD Dr. Christina aus der Au, Prof. Dr. Raji Steineck*  
University of Zurich, Room UZH KOL-G-217

---

### 6:15 PM **Three Theories of Everything**

A lecture on the fundamental questions of life.

*Ellis Potter*  
University of Zurich, Room UZH KOH-B-10

A former Buddhist monk and now Christian minister and philosopher, Ellis Potter has a unique view on life. In this lecture, he explores three major world-views that propose radically different answers to the fundamental questions many people ask themselves.

## Thursday 27.10.2016

---

### 6:15 PM **Big Questions**

Two physicists discussing the fundamental questions of life. The discussion will be in English, there will be an Q&A session at the end and an Apéro afterwards.

*Prof. Dr. Ard Louis vs Prof. Dr. Ben Moore*  
ETH Zurich main building, Room E5

How did everything begin? Why is there something rather than nothing? Did the universe need a creator? Why do we exist? How can we understand the world in which we find ourselves? Looking closely at our world one cannot help but wonder about these and similar questions. Professors Ben Moore and Ard Louis, both physicists, are dedicated to seeking answers. In this discussion they will talk about their findings and the more controversial issues surrounding them. Will Christian faith give decisive insights to the matter or will science alone have all the answers?
